Subject: Planning reference 16/01971/MFF Port Na Mine Fish Farm (Etive 3)

Hi,

I have worked for Dawnfresh for a number of years as I support the move towards sustainable seafood as a major source of protein in the UK.

I think the move of 70m pens to 80m pens reduces the number of pens required (and therefore the physical impact) whilst maximising efficiency.

I hope that the planning permission is supported and we can help the Scottish seafood industry to thrive whilst minimising the number of sites.

Thanks

Raleigh
